OBJECTIVE

Aspiring graduate pursuing a Bachelor's degree in Computer Science, eager to leverage programming skills and internship experience in a dynamic software development environment.

EDUCATION

Bachelor of Engineering in Computer Science (Specialization in AI and ML)

PSG College of Technology

Expected 2027

Higher Secondary Education M.A.M Matriculation School

2021 - 2023

EXPERIENCE

Technical Member, GitHub Campus Club (GCC)

Sep 2024 – Present

A student-led community focused on fostering collaboration, open-source contribution, and technical growth within the campus ecosystem.

- Actively contributed to the planning and execution of non-technical events, coordinating logistics, outreach, and participant engagement activities.
- Collaborated with cross-functional teams to ensure smooth event operations and effective communication among organizers and participants.

PROJECTS

Lumerion – Learning Management System (React, Tailwind CSS, Node.js, Express, PostgreSQL, Drizzle ORM)

A dynamic AI-powered learning management platform that generates personalized study roadmaps based on a given topic and enables collaborative learning through study groups.

- Built a full-stack web application that creates customized learning paths tailored to user goals and selected topics.
- Implemented study group functionality with collaborative note-sharing, progress tracking, and interactive learning features.
- Designed and developed RESTful APIs using Node.js and Express with PostgreSQL and Drizzle ORM for efficient data management.

VitaLink – INR Monitoring Application (Flutter, Node.js, Express)

An INR test value and dosage tracking application designed to help patients monitor anticoagulation therapy effectively and safely.

- Developed a secure backend using Node.js and Express for managing patient INR records and dosage history.
- Built a cross-platform mobile application using Flutter for tracking INR test values, dosage updates, and treatment progress.
- Implemented features for dosage history monitoring, value logging, and structured treatment management.

SKILLS

Programming Languages

C, Java, JavaScript, Python

Web Technologies

React js, Express, Drizzle, Flutter

Database Languages

MongoDB, PostgreSQL

Tools

Git, Github, Docker

HOBBIES

- Playing Badminton
- Playing Keyboard
